

National Cane Shredder

PATENTED UNDER THE LAWS OF THE HAWAIIAN ISLANDS

THE UNDERSIGNED HAVE BEEN APPOINTED SOLE AGENTS FOR these SHREDDERS and are now prepared to receive orders. The great advantages to be derived from the use of the NATIONAL CANE SHREDDER are thoroughly established and acknowledged by Planters generally.

The large number of Planters using them in the United States, Cuba, Argentina Republic, Peru, Australia and elsewhere, bear witness to the above claim.

The use of the SHREDDER very largely augments the quantity of cane the mill can grind (25 to 30%), also the extraction of juice (5 to 12%).

It is a great safeguard, making known at once the presence of any pieces of iron, stakes from cars, or anything which would be liable to damage the mill, and allowing ample time to remove same before damaging the mill.

The SHREDDER is very strongly made, and from the manner of its operation it cuts or tears these pieces of wood or iron without often breaking the SHREDDER, and if anything breaks, it is simply some of the knives or cutters, which can be quickly and economically replaced. The SHREDDER, as its name indicates, tears the cane into shreds of varying lengths, perfectly opening it and allowing the mill to thoroughly press out the juices without requiring the immense extra power necessary to grind or crush the whole cane. The SHREDDER spreads the shredded cane uniformly and evenly to the mill rolls, and does away with the necessity of spreading the bagasse by hand between the mills, where regrounding is in use. No greater amount of boiler capacity is required to operate the SHREDDER than that which was sufficient for the mill, for the above reasons. We furnish full working drawings for the installation of our SHREDDERS, enabling any competent engineer to successfully install and start them.

In ordering SHREDDERS from us, please send small sketch, showing the diameter and width of the mill rolls with which SHREDDER is to be connected, also the side (either right or left hand as you face the delivery side of the mill), upon which the mill engine is located, also the height from floor line to center of front mill roll shaft, and distance center this shaft to front end of bed plate. These SHREDDERS are now being used by the Hilo Sugar Co. and Hana Mill, Kona, where they are giving great satisfaction.

Prices and further particulars may be had by applying to

(Continued from 1st Page.)

pieces, the forward barbettes was smashed to atoms and blood and destruction were everywhere. The effect of the arrival of this battered and scarred vessel was to arouse in the Chinese naval officers and men a strong determination to be avenged on their enemies.

A native paper has a story about two Japanese having rendered five of the large guns at Woosung un-serviceable. The story says that the Japanese, dressed in foreign clothes, were observed pouring acid into the breach of the guns, and that when the soldiers went to arrest them, one of them jumped into the water and escaped. The other man was taken into custody and will be tried in due course. Five of the guns are stated to be absolutely useless, and a message was sent off at once to the Kiangan arsenal to replace them.

TROOPS IN COREA.

YOKOHAMA, August 12.—The Chinese troops who left Gishu for Seoul toward the end of last month were probably not more than 7000 nor less than 5000. If they have advanced at the intended rate they must now be close upon Heijo. Again, 3000 or 4000 have landed at the river Daidero. To these must be added the fugitives from Seikwan and Gazan. It will not be far wrong to estimate the strength of Chinese troops in Corea at between 10,000 and 15,000. Though there were said to be 6000 or 7000 at Gazan, the actual number must have been far less, if we may judge from the fact that by the defeat of the 2800 men at Seikwan the intrenchment of Gazan fell into the hands of the Japanese.

The actual number of Chinese at Gazan has been reported to the authorities to have been 5500. A Jinsen correspondent hears from Chefoo that as soon as the Chinese authorities heard of the fate of their transport at Fung-tao, the troops which had just left Tient-sin were made to put in at Shan-hai-kuei. On account of the dislodgment of the Chinese from Gazan, the same paper hears, the sea route between Jinsen and Gazan was reopened from the 5th.

The intention of the Chinese Government is to make Corea the seat of war, so that the effect of a defeat may not be felt in China itself. The Chinese Government will rely mostly on its navy; everything will be done to prevent the Japanese warship from landing troops in China and to cut off the communication between Japan and Corea so as to isolate the Japanese troops in Corea. And then to fight these troops, she has sent about 10,000 men, it is said, to Gishu to march upon Seoul by land, while 4000 more, having been landed, it is rumoured, at Heijo, on the road between Seoul and Gishu. Gishu is about 234 miles from Seoul, while Heijo is half-way. These will join and await the result of the battle of Gazan. They will surround the Japanese at Seoul.

Major Koshi Masatsuna commanding the third company of the Twenty-first regiment, Fifth division, now in Corea, is said to have committed suicide at Shichig-n. The cause, it is reported, was an error in tactics, the responsibility for which the Major took upon himself and put an end to his own life.

WORK OF JAPANESE GUNS.

TOKYO, August 14.—The following details were received here about the Chinese war vessel known as having fled toward A-San after being engaged with the Japanese ships near Phung-do on July 25th: On the morning of July 27th the Takachiho and the Maya lowered their boats and proceeded to inspect the condition of the Chinese war ship. She was found stranded on the bar at the western inlet of Caroline bay. On close examination the magazine was seen to be torn open, thus causing a great part of the body of the ship to be filled with water.

The wooden portion was, moreover, burnt away, while at a point about two-thirds of the vessel's length from the bow she was broken in two. The corpses of the crew were lying in heaps beside the guns on the starboard side, and the conning tower was virtually shattered. Within it was the corpse of an officer standing. He may have been the captain of the ship.

On the lower deck indications were discerned of many other bodies, but they could not be clearly seen owing to the deck being under water. The guns from the Japanese vessels must have hit the ship with deadly precision, for even in the part standing out of the water more than ten penetrations were visible. Three of the boats were found stranded along the shore. The survivors must have landed by them. A twelve-centimeter gun found on the upper deck appeared to be serviceable.

STEAMER MEN'S OPINION.

The officers and the passengers of the Belgic could give little news of the war, says the San Francisco Chronicle of the 5th inst. When a reporter boarded the steamer shortly before midnight those on deck inquired eagerly for news, stating that the Governments had control of the wires in the two countries and would not let any news get out. Little was known beyond what was brought over in the papers.

One story was told of the remarkable cunning of the Chinese in an engagement, but the name of the place where the battle took place was not known, except that it was on the Korean border. A small detachment of Chinese was sent out to attack a strong force of Japanese. The latter turned out in force and almost annihilated the small band of Chinese. Those who were left retreated and lured the Japanese on to an underground mine.

When the exultant Japanese rushed forward shouting out victorious cries the mine was fired and about 500 Japanese were blown into the air. The entire Chinese force then swarmed against the remainder and cut them down. The general belief among the officers of the Belgic is that the Chinese would not be a great while in bringing the Japanese Government to terms.

LUCOL :-

IS THE

BEST

PAINT

OIL!

-

Save Half the Amount of Your Oil

Bill Through Saving in Pigment.

Every painter should use LUCOL instead of Linseed Oil, because:

1. LUCOL is more durable than Linseed Oil.

2. LUCOL is more economical than Linseed Oil.

PROOF THAT LUCOL IS MORE DURABLE.

Six years of actual use in exterior house painting in California (the most trying climate for paints), in the burning heat of the Arizona Desert, the Arctic cold of Alaska, and on the Atlantic coast, have fully and practically shown that LUCOL always outlasts Linseed Oil under the same conditions. All the acid works in San Francisco have discarded Linseed Oil for LUCOL.

ILLUSTRATE THIS YOURSELF.

Put strong ammonia on Linseed and LUCOL paints. The Linseed paints are destroyed in a few minutes; the LUCOL paints are practically unaffected.

PROOF THAT LUCOL IS MORE ECONOMICAL.

Break up 1 1/2 lbs. paste white lead in one pint of LUCOL, and the same quantity in one pint of Linseed Oil. Spread the paints on similar dark surfaces for comparison. The LUCOL paint spreads as far as and covers much better than the Linseed paint. To get equally good covering with the Linseed paint you have to use 2 1/2 lbs. of white lead to one pint of Linseed Oil. This means a saving of 1 lb. of paste lead to each pint of LUCOL used, or 6 lbs. to every gallon, equivalent to your saving more than half the first cost of the LUCOL.

LUCOL is not in competition with cheap Linseed Oil substitutes.
